Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)				
	10/502,279	ENDOH ET AL.				
Office Action Summary	Examiner	Art Unit				
	Amber D. Steele	1639				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on	_·					
2a) This action is <b>FINAL</b> . 2b) This	action is non-final.					
3) Since this application is in condition for allowar	nce except for formal matters, pro	secution as to the merits is				
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4)⊠ Claim(s) <u>1-19</u> is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6) Claim(s) is/are rejected.						
7) Claim(s) is/are objected to.						
8)⊠ Claim(s) <u>1-19</u> are subject to restriction and/or €	election requirement.					
Application Papers						
9) The specification is objected to by the Examiner,						
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:						
1. Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau						
* See the attached detailed Office action for a list of the certified copies not received.						
Attachment(s)						
1) Notice of References Cited (PTO-892) 4) Interview Summary (PTO-413) Paper No(s)/Mail Date						
3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  5) Notice of Informal Patent Application (PTO-152)						
Paper No(s)/Mail Date 6)						

Art Unit: 1639

### **DETAILED ACTION**

## Status of the Claims

1. Claims 1-19 are currently pending.

### Restriction

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, drawn to a method of screening a protein for altering glucose metabolism.

Group II, claim(s) 2, drawn to a method of screening a protein for triggering edema.

Group III, claim(s) 3 and 5-6, drawn to a cell transformed with a nucleic acid encoding the polypeptide of SEQ ID No. 4.

Group IV, claim(s) 4-6, drawn to a cell transformed with a nucleic acid encoding the polypeptide of SEQ ID No. 8.

Group V, claim(s) 7, drawn to a method of detecting a test substance that alters glucose metabolism and utilizes SEQ ID No. 4.

Group VI, claim(s) 8-9, drawn to a method of screening a drug altering insulin resistance and utilizing SEQ ID No. 4.

Group VII, claim(s) 10, drawn to a method of detecting if a test substance triggers edema.

Group VIII, claim(s) 11-12, drawn to a method of screening a drug for altering insulin resistance and utilizing SEQ ID No. 8.

Group IX, claim(s) 13, drawn to a cell transformed with a nucleic acid encoding the polypeptide of SEQ ID No. 17.

Group X, claim(s) 14, drawn to a method of detecting a test substance that alters glucose metabolism and utilizes SEQ ID No. 17.

Art Unit: 1639

Group XI, claim(s) 15-16, drawn to a method of screening a drug that alters insulin resistance and utilizing SEQ ID No. 17.

Group XII, claim(s) 17-18, drawn to a method of screening a drug that alters insulin resistance and utilizing SEQ ID No. 26.

Group XIII, claim(s) 19, drawn to a method of producing a pharmaceutical composition.

3. The inventions listed as Groups I-XIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common technical feature is PPAR. PPAR is known in the art.

Specifically, Taniguchi et al. (U.S. Patent 6,365,361 B1 issued April 2, 2002) teach PPAR and methods for identifying or screening agonists and antagonists of PPAR (please refer to the abstract). In addition, Taniguchi et al. teach that the yeast two-hybrid system may be utilized in the methods (please refer to column 3, lines 1-10; column 5, lines 22-33; Example 1). Furthermore, Taniguchi et al. teach that ligands for PPAR (including PPARγ) are linked to altered glucose metabolism and insulin resistance (please refer to column 1, lines 56-67 and column 2, lines 1-8). Therefore, the common technical feature of PPAR is known in the art.

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

For Group XIII: a. species of screening step

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Page 4

The claims are deemed to correspond to the species listed above in the following manner: For Group XIII: Claim 19.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species are structurally and/or functionally different.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Application/Control Number: 10/502,279

1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1639

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR

## Future Correspondence

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amber D. Steele whose telephone number is 571-272-5538. The examiner can normally be reached on Monday through Friday 9:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang can be reached on 571-272-0811. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
